

WHISPER

AN IRIIDIUM SATELLITE-BASED TRACKING DEVICE WITH INTEGRAL PANIC BUTTON AND TWO-WAY TEXT MESSAGING

TRACKING

Whisper operates on the Iridium satellite network, which offers complete global coverage. Robust and versatile, the device can be hand-carried or deployed as a vehicle tracker using the optional vehicle kit. AES-256 bit encryption is offered as standard across Iridium, ensuring the integrity of data. The reporting interval can be changed as required, from one minute upwards. Waypoint marking and 'check-in' messages are supported, all controlled through the colour LCD screen.

THE WHISPER PROVIDES TRACKING, SOS ALERT AND ADVANCED MESSAGING CAPABILITIES FOR PERSONNEL AND VEHICLES ANYWHERE IN THE WORLD.

PANIC ALARM

When the panic button is pushed, audible and visual alerts appear on the monitoring platform. Notification of the alarm is also automatically forwarded by SMS and e-mail to nominated recipients.

MESSAGING

The Whisper provides advanced 2-way text messaging between the device and Track24's tracking Platform, device to device, device to group, and device to mobile phone & e-mail. Free text and predefined canned messages are supported.

NEAREST RESPONDER CAPABILITIES

By pressing the panic button users can notify those closest to them of an emergency.

MONITORING PLATFORM

The Whisper is combined with Track24's monitoring and incident alert platform to enable organisations to view and communicate with their personnel and assets on a common operating picture.

WHISPER SPECIFICATIONS

Dimensions:	H135mm x W61mm x D35 mm
Weight:	300g
Operating Temperature:	-20°C to +55°C
Ingress Protection:	IP67
Battery Life:	Impressive battery life allows for over 8 days' continuous operation (at 15-minute position reporting)
